PREFACE

N placing the 1910-1911 Edition of the Richmond-Martinez-Antioch Directory to our patrons, we fee confident that it will be found accurate in every particular; especial pains have been taken to bring every department up to the latest possible date. No expense has been spared to give Richmond, Martinez and Antioch a Directory equal in every respect to those published in the largest cities of the country.

The experience of the past years devoted exclusively to Directory making has been used to excellent advantage in the compilation and publication of the Richmond, Martinez and Antioch Directories and it is confidently believed that this publication will elevate the standard of Directories in California, and it will be found the equal, if not the superior, of any similar publication in America.

Respectfully,
R. L. POLK & CO

RICHMOND

ICHMOND is located ten miles north of Oakland and is connected with that city by The Southern Pacific and Santa Fe Railways and by electric cars.

Here is the great Western plant of the Standard Oil Company, the largest refinery west of Chicago. Its establishment at this point involved two great undertakings—the laying of a double pipe line from the oil fields of Kern county, 260 miles distant, the creation of pumping stations at frequent intervals to force the beavy crude oil from the wells to the reservoirs at tide water, and the building of the complex and immense refining plant, including a can factory with a capacity of 30,000 five-gallon cans per day. How complex is the system of refining the crude California oil with its asphalt base only an expert could tell.

Two large wharves are part of the necessary equipment, and the assembling of a fleet of vessels to carry the product.

About 1,000 men are employed regularly, many more being required when the Company is doing any constructive work.

Richmond was chosen by the Standard Oil people because of its location, its San Pablo hills, its harbor, and its transportation facilities. The system is so arranged that the oil is handled almost entirely by gravity, the oil flowing from the highest points into the tanks lower down, to be from thence drawn off, refined and treated.

Pumping plants are located on the bay shore and other places where gravity is not available, the wharf carrying pipe lines through which are forced the cargoes of oil-carrying vessels. The plant covers 300 acres and is laid out systematically in divisions, streets and blocks.

A fleet of carrying steamers and vessels are required, and train loads of products go by land every day in the year. Nearly 100,000 barrels of crude oil were handled during the month of May from the various districts from which this company draws their supplies. The works has its whale-oil plant near the bay shore, great car shops for repairing and equipping cars, can and barrel factories on the wharves at Point Orient whence are shipped the case oils to China and Japan.

The California Wine Association is another large corporation with headquarters and works at Richmond. "Winehaven" is at the extreme end of the Richmond peninsula, occupying a tract of forty-seven acres, and using a wharf 2,000 feet long, and the Belt Line Railway to facilitate handling freight. The plant has a crushing capacity of 25,000 tons of grapes and can store 10,000,000 gallons of wine. The company owns vineyards and operates wineries in nine or ten counties, about forty in number, and seeks to include all valuable grape-growing districts, qualities of soil, temperature and exposures. This is one of the largest establishments of the kind in the world. The trade of the Association is practically world wide reaching the various countries in Europe, Egypt, the Philippines, Hawaiian Islands, China, Japan and South America.

About one hundred men are employed ordinarily at Winehaven, but during the active season the total number will reach into the thousands.

It is the aim of the Association to keep California wines pure, and to promote their use as better than the distilled liquors used in this country.

The Pullman Car Company of Chicago is engaged in the erection of a plant covering twenty-one acres of ground near the city limits, which, when completed, will employ in the neighborhood of 1,500 men. This plant, which consists of seven large buildings, will be devoted exclusively to the repair of the Company's cars on the Pacific Coast division of all the large transcontinental roads, including the Southern and Western Pacific, the Santa Fe, the Oregon and Navigation, the Great Northern and the Northern Pacific railways. The Western shops of this great corporation have heretofore been located at Denver, Colorado, but the Company decided that they could be operated more profitably at San Francisco and chose Richmond as the site for their new location. The big plant is practically completed and by January 1, 1911, will be in operation with a full force of mechanics at work.

The Western Steel and Pipe Company of Los Angeles has located a large pipe and steel works in Richmond, employing 200 men and with the Company contemplating added improvements to the plant this force will be even more enlarged.

Richmond also has the repair shops and terminal yards of the

Santa Fe Railroad, employing 500 or more men; the Richmond Machine and Iron Works, the Berkeley Steel Co., the Richmond Manufacturing Co., the Richmond Pottery Co., the Los Angeles Brick Co., the Central Brick Co, the San Francisco Quarries Co., the Richmond Stone Quarry Co., chemical works, cocoa works, planing mills, flour mills, lumber yards, harvester works, breweries, ship yards, etc., representing probably a capitalization of \$30,000,000 and paying out to employes fully \$250,000 per month.

Many of the manufactories along this seventeen-mile water front are large enterprises with ample capital and an established business reaching all along the Coast and represented in many Eastern centers.

The Center of Richmond

MARTINEZ

ARTINEZ a prosperous town and the county seat of Contra Costa County, is 29 miles from Oakland, via the Southern Pacific railway.

Here are the Payton Chemical Works, the Bull's Head Oil Works and the Mountain Copper Company, the latter supplementary to the works at Keswick, Shasta county, where the company has extensive mines. The great chimney or "stack" forms a conspicuous landmark on the bay shore, but all deleterious fumes or gases have first been condensed and removed.

The Payton Chemical Company, in addition to the manufacture of sulphuric and nitric acid, do a general smelting business, buying and smelting ores of all kinds. Handsome residences for the officers and cottages for the employes are provided, and the grounds are attractive.

The waters of the bay and the extensive marsh lands isolate the point where the works are located, and the prevailing west and southwest winds carry away all smoke and gases out over the water, so that the smoke which emerges is not hurtful in the least to surrounding vegetation.

Much sulphuric acid is manufactured here, and a fertilizer of great value. The company have offices in San Francisco and London,

The natural mineral water found in the little Alhambra Valley is bottled at Martinez, being delivered through galvanized pipes at the bottling works. The waters are pleasant to the taste, and very valuable for many ills of the stomach and affections of the blood.

DRAKE

228 Richmond Av, Point Richmond; 948 Market Street, San Francisco; Room 14, 1219 Broadway, Oakland.

ANTIOCH

NTIOCH is a thriving village on the Southern Pacific railway, 48 miles by rail from Oakland.

Here are located the California Paper and Board Mills, making wrapping papers, folding box boards, Lynwood or plush boards, etc. The board machine is one of the largest made, and required thirty freight cars to bring it to the Coast. It turns out from forty to fifty tons of board daily.

An asparagus cannery is also here, the canning of this delicious vegetable improving its qualities chiefly because it is handled directly from the field.

The California Brick and Clay Manufacturing Company and the Holland Brick and Sandstone Company are here also, as also the Antioch Lumber Company.

Antioch has a fine water front, with forty feet depth of water at the end of short wharves.

The California Powder Works are to be located a few miles east of town and will cost close to \$3,000,000. Plans are all arranged and work is to begin soon.

New Antioch Paint Shop
